WhatsApp setup for Watersun Solar

For the agency that manages Watersun's Facebook. About 30 minutes of work.

Use **Watersun's own** Meta business account, not the agency's. Don't create a WhatsApp account yourselves; the developer does that after step 3.

1 Make the Facebook Page and website match

- Website **watersunsolar.com**: replace the dummy number **+91 98765 43210** with Watersun's real number. Do this on every page and on the "Chat with our solar experts" WhatsApp button.
- Facebook Page: change the pincode from **395010** to **385340** (Plot 40, GIDC Radhanpur).
- In **business.facebook.com → Settings → Business info**, enter the legal name and address **exactly as on the GST certificate**, and the website **watersunsolar.com**.

2 Submit for verification

- **business.facebook.com → Settings → Security Center → Start verification**, then upload the GST certificate.
- It's free. Meta takes about 2–10 working days. Don't buy "Meta Verified" (a paid blue tick that isn't needed).

3 Invite the developer

- **Settings → People → Invite people**, enter **sadafmhavish953@gmail.com** and choose **Full control**.
